Mistral is a product by

PREDICT SRL
Viale Adriatico c/o Fiera del Levante - Pad. 105 - 70132 Bari
www.predictcare.it

Mistral is the innovative breath analysis-based technology that enables early, non-invasive diagnosis and metabolic monitoring.

Mistral Lab is a Predict solution, a high-tech and automated space created to provide a service to the territory.

Here, we do breath analysis and provide a closer look at the features, functioning and benefits of Mistral and breath analysis solutions, thanks to the support of our team of specialists.

MISTRAL

Patent:

Mistral is an internationally patented technology.

Certification:

CE marked product according to EEC directive 93/42.

SRA

- > Complies with **EMC** and **RFI** standards
- > **IEC:** 61010-1, 60101-2-010, 60101-2-081

Complete list of certifications available upon request.

How? In a SIMPLE and FAST way.

1

COLLECT

The patient blows into a disposable mouthpiece. The Mistral sampler collects the exhaled breath in one cartridge and an ambient air sample in another

2

ANALYZE

Cartridges come to the Mistral Lab for sample analysis and characterisation, using Agilent and Markes technologies distributed by SRA Instruments.

3

EVALUATE

The study of experimental and anamnesis data with IOT technology and AI algorithms allows a report to be generated and automatically sent to the doctor.

4

INFORM

The doctor produces a report and informs the patient about the diagnosis.
